

Lismore South Public School

Planning update | April 2023

Rebuilding Lismore South Public School

Dear staff, parents/carers,

Planning is continuing for the rebuild of Lismore South Public School.

School Infrastructure NSW is working with the Northern Rivers Reconstruction Corporation (NRRC) to ensure we have the data needed to inform planning for how Lismore South Public School will be rebuilt. This includes future enrolment data, informed by the Resilient Homes Program, including home buybacks, as well as planning considerations and flood modelling. These considerations may impact on future design for the school and the viability of the existing school site.

We expect to be in a position to provide a timeline for the planning, design, and delivery stages of rebuilding Lismore South Public School in Term 2, 2023.

Please be assured that rebuilding Lismore South Public School is a priority and we are working towards this goal as quickly as possible.

Thank you for your ongoing patience.
